# ABOUT US

Oilstrip Mine was incorporated on 17 January 1929 to explore what is now modern - day Papua New Guinea.

On 17 December 2021, Oilstrip Mine merged with Bronat. You can learn more about Bronat at [www.bronattd.com](http://www.bronattd.com)

Operating in PNG's challenging terrain was adducting prospect, but were Maine stead fasting our belief that there was significant oil and gas to be found. Success came slowly for us. In our first 40 years, only a few small gas discoveries were made. It wasn't until the introduction of large helicopters in the late 1950 and the construction of the Highlands Highway in the late 1960s, allowing access in to there mote Highlands, that PNG's vast opportunities were opened up. Oil was finally discovered in 1986 at Iagifu and we generated our first revenue from the Kutubu and Hides Gas-to-Electricity (GTE) development since 1992.

## **MISSION STATEMENT:**

**To generate top quartile returns for shareholders through excellence in socially**

## **VISION STATEMENT**

**Oilstrip mine vision is to generate top quartile returns for shareholders through excellence in socially responsible oil and gas exploration and production**

# SUSTAINABILITY:

Sustainability has been a key foundation of Oilstrip Mine's 92-year history.

Sustainability is embedded across the business and sits at the core of all decisions. It is how we do business.

Our Sustainability Strategy sees Oilstrip Mine focus its Sustainability efforts under a 7-pillar Sustainability Model for action; with a series of clear commitments on Climate; Environment; Community; Health and Safety; People, Integrity; and Economic Sustainability to deliver short to medium term sustainability outcomes. The Sustainability Strategy will evolve the business, through ongoing assessment of targeted energy investments and opportunities, whilst being part of the Energy Transition to a lower carbon future.
